Seven Die In Eastern Plane Crash

By MARVIN R. PIKE

ROCHESTER, N.Y. (AP) — A twin-engine Mohawk Airliner, straining to gain altitude in a ragging electrical and hail storm, crashed seconds after takeoff Tuesday. Seven persons were killed and 36 injured, seven of them critically.

"It was like flying into the dead of the night," one survivor said from his hospital bed.

"The wind grabbed us the minute we left the ground," said another.

The Martin 404, carrying 40 passengers and a crew of 3, was headed for Newark, N.J., via White Plains, N.Y. It fell into mud about 80 yards off a runway at Rochester-Monroe County Airport, several miles southwest of Rochester.

An investigation was begun by federal aviation officials.

One wingtip apparently struck the ground, a witness said. The plane bounced, broke in two like a matchstick and caught fire. Airport firemen extinguished the flames.

The dead included the pilot, Capt. Richard M. Dennis, 39, Fairview, N.J.; First Officer John W. Nell, 33, Wilmington, Del., and Roy E. Drew, Pelham, N.Y., controller of Sylvania Electric Products Inc.

Others killed were:

Jerrold Kurtz, Harrison, N.Y.; Thomas Callinan, Yorktown Heights, N.Y.; Morris Falk, Cos Cob, Conn., and Lee O'Dell, Westport, Conn.

Stewardess Mary Anne Miara, 19, of Sayreville, N.J., was reported in fair condition at one of three hospitals caring for the injured.

Richard Baldwin, 26, Danbury, Conn., said the plane hit turbulence when "we got up 10 feet. It was like flying into the dead of night."

"Wind draft pushed us around," (Turn to Page 3, Column 1)

Colorado's Request for Drought Aid
Turned Down by Federal Government

By United Press International

Colorado's request for federal aid in 15 drought-riden counties was turned down Tuesday by the Department of Agriculture.

The denial was announced shortly before the Colorado State Uni-

Fremont, Jefferson, Kit Carson, Las Animas, Pueblo and Teller. He made no reference to later re-

quests submitted for Gilpin, Clear Creek, Park, Lake and Chaffee

counties.

The denial was announced shortly before the Colorado State Uni-

versity extension service reported that the distressed areas in your

most of the moisture from June state have received rain, that con-

ditions are improved and that

had been used up by the parched farmers are busy sowing feed

range and croplands.

Gov. John Love reported Tues-

day that Secretary of Agriculture Orville Freeman had notified the state of the denial. Freeman said growth, however, on the basis of

rain had improved conditions since all information available, we have

determined that conditions in the

request was made.

New Expulsion Of Russian Not Very Big Splash

By LEWIS GULICK

WASHINGTON (AP)—American officials doubt that the latest ouster of a Soviet diplomat for tripping over his cloak and dagger will make much of a splash in U.S.-Soviet relations.

Twenty-seven Russians have been sent packing from the United States in similar cases since 1950. Sometimes the Kremlin counter punches by booting an American diplomat out of Moscow. Despite the drama, East-West issues follow their course.

Monday the State Department ordered the immediate expulsion of Soviet Embassy "cultural attaché" Gennadi G. Sevastyanov, 33, accused of trying to recruit as a spy a Russian-born employee of the U.S. Central Intelligence Agency.

The CIA employee—who in prop-

er espionage fashion was identi-

fied only by the pseudonym of "John"—tipped off the FBI after he was first approached by the Soviet attache on April 28.

FBI agents lay in hiding to photograph and document "John's" subsequent meetings with Sevastyanov, whom U.S. officials described as "an agent of the Committee for State Security (KGB), the Soviet Union's secret police."

The Washington spy case, which comes hard on the heels of security and espionage investigation in Britain and Sweden, also involved a third man: the CIA employee's brother who still lives in the Soviet Union.

U.S. sources said the brother was slipped into Washington last April under guise of being a Soviet official to help in Sevastyanov's attempt to recruit John.

The State Department put an end to Sevastyanov's activities

here with a note handed to the Soviet chargé d'affaires, Georgi M. Kornienko.

A Soviet Embassy spokesman denied the U.S. charges. U.S. officials made public photographs and said the FBI had documentary proof, gathered in shadowing the case virtually from the place. John never kept any of these dates.

The brother, an employee of the Scientific Institute of Cattle-raising and Animal Husbandry at Frunze, a city in Soviet central Asia, left for the Soviet Union on May 4 and U.S. officials let him go. They figured he was only a victim of KGB pressure.

The CIA employee, who is still in the process of gaining his American citizenship, was entering his apartment in a Washington, D. C., suburb about 9 p.m. April 28 when he heard a voice whispering his name. He turned to see his brother, whom he had not seen for 23 years.

Along came the chauffeur of the brother's car, who was introduced as "Ivan Ivanovich"—but who really was Sevastyanov.

The trio met three times in all—on April 28, April 30 and May 2. When he advised the FBI of Sevastyanov's actions John was told to continue the get-togethers, which FBI agents kept under close watch.

Sevastyanov promised John a good position if he would return to the Soviet Union—provided he first served Soviet interests "for a while" while working for the U.S. government.

The KGB agent asked John specific questions about his work, concentrating first on information which might be used to set up a spy network within the CIA.

Classroom Teachers Attack Segregation

DETROIT (AP)—The nation's resolution was proposed by Pat Tornillo of Dade County Miami, force of numbers, are pressuring Fla.

The NEA, sensitive to the feelings of white teachers in the South, has been reluctant in the past to go quite this far. General's views carry a lot of weight, however, because it represents about 800,000 of the NEA's total membership of 860,000.

Monday the teachers adopted a resolution which urged "local, district and state associations to open their membership doors to all teachers, regardless of race, color or creed."

The resolution is aimed directly at 11 Southern states which have separate NEA affiliates for white and Negro teachers. The Second class postage paid of Colorado Springs, Colorado.

Space Trips Will Not
Be Commercialized

WASHINGTON (UPI)—A member of the House Space Committee Monday asked the space agency to stop the 16 U. S. astronauts from signing a \$3.2 million story and movie contract.

Rep. John W. Wyler, R-N.Y., said the "injection of commercialism" would have an effect on the public's attitude toward the space program.

Wyler asked James E. Webb, head of the National Aeronautics and Space Administration (NASA) to disapprove the contract.

Wyler noted in a statement that Field Enterprises Educational Corp. was offering the money for "stories of future space flights and some movie rights."

The sale of astronauts' stories, Wyler said, should be confined to those events unconnected with their duties and performance as astronauts.

"These stories belong to NASA and the American people and should not be for sale to the highest bidder," he said.

Seven Are Killed In Eastern Plane Disaster

(Continued From Page One) observed Robert Christopher, 28, of Stratford, Conn. "All the pilot was fighting the stick all the way."

Thomas Mayer, 55, Westport, Conn., said the plane had climbed to an altitude of 75 or 100 feet when it happened in 20 seconds."

"I was thrown clear of the plane and landed in mud up to my elbows," said John L. O'Brien, White Plains, reported in fair condition with a skull fracture, cuts and bruises.

Ex-Marine Joseph Pearson of Tonawanda, N.Y., a worker on a construction project, helped pull survivors from the plane.

"One man was walking around with his ear torn and bleeding," Pearson said. "He asked for help but I said there's no time. We've gotta get those people who are still in there."

Other passengers included:

Jane R. Nixon, White Plains, the only woman aboard other than the stewardess; Charles V. McAdam, Greenwich, Conn., president of McNaught Newspaper Syndicate; Gene K. Beare, Darien, Conn., president of Sylvania Electric Products, and Dr. Lee Davenport, president of General Telephone and Laboratories, Inc.

The airport's chief controller, Loren Wagner, said "the pilot asked for clearance and the request was complied with." Wagner declined to name the controller.

The crash was the second in the history of Mohawk Airlines and its predecessor, Robinson Airlines.

A Robinson plane crashed near Utica on Labor Day 195 with the loss of 16 lives.

Cripple Creek, Victor Picnic To Draw 300

More than 300 persons are expected to attend the 15th annual Cripple Creek-Victor picnic Sunday at the Chuck Wagon site in the Garden of the Gods.

All former Gold Campers as well as those now living in the Cripple Creek-Victor area, are invited to attend, according to H. J. "Jolly" Johnson, president of the sponsoring Cripple Creek-Victor District Club.

Activities are scheduled to start at 10 a.m. and will last until about 4 p.m. Those who plan to attend should bring their own lunch; the club will furnish coffee, cream and sugar.

The Cripple Creek-Victor High School band will furnish entertainment. Picnic kits will be provided for youngsters.

Johnson said he expected attendance from many cities in the state, as well as from communities in the Pikes Peak region. There will also be some vacationing out-of-staters at the picnic.

Special invitations have been sent out to more than 500 former residents of the Gold Camp, he said.

Another Commie Plot Crushed, Iraq Announces

(Continued From Page One) camp at Rashid this morning was put down in half an hour.

The broadcast gave no details of the action and did not mention what if any casualties were suffered.

"A Communist plot staged by a total of \$48 were removed from some Communists and agents to her car between May 15 and June 1. The camp at Rashid camp was crushed while it was parked in a military forces, the national guard.

In another case, a tire and the police and the people," a car wheel was stolen from the car of John B. Coates, 2434 Lark Dr., Monday night.

The car was parked in front of the fire.

In the third case, Gene Andrew Lacour, 810 E. Rio Grande St., told police that two tires and wheels worth \$60 were stolen from his car while it was parked behind Conley's Garage, 725 E. Fillmore St. Monday night.

Mrs. Anna Bradley, Long Sick, Dies

Mrs. Anna Bradley, 1424 Tweed St., widow of Charles Bradley, died at 83 at a local hospital Tuesday. She had been a resident of Colorado Springs since 1946 and was a member of the Corpus Christi Catholic Church. She had June over the same month in 1962, it was reported today by James O'Leary, deputy city treasurer.

This year's June total was \$15,855.60 as compared with \$8,654.20 for June, 1962.

Similarly, O'Leary said, the total for the first six months of 1963 is \$69,431.60, which compares with \$40,995.20 for the first half of 1962.

The increase is due to the fact Drawing Room A request that the City Council increased high mass will be celebrated at the cigar tax from one to two three minutes before 9 a.m. Friday at the Corpus Christi Church. The Rev. Msgr. Anthony G. Elia will be in charge. Burial will be in the St. Michael Cemetery, Denver.

News Briefs and Announcements

MOUNTAIN CLUB — The Pikes Peak Group of Colorado Mountain Club has scheduled Snowmass and Capitol Peaks for July 4 thru the 7th with the leader Lester Michel. Register with Ed Wallick 634-3625. Both peaks over 14,000 feet. Leave Thursday at 9:00 a.m. Sunday July 7, there will be a trip over Palmer trail to Crystal Park with Jeanette Mass for leader. Register with her 622-4835 and meet at Palmer High School. Weber St. at 9 a.m.

FEW days left, The Book Home sells all books, paperbacks. New and used books at half price. Visit The Book Home at 16 East Kiowa today.

WE are happy to announce the appointment of G. Donald Larson, M.D., to the staff of the Central Colorado Medical Center, 2217 East Platte Ave. Practice limited to the eye.

BIRD CLUB — The Aiken Ornithological Society has planned a field trip for Sunday, going to Cascade. The group will meet at the home of Mahlon Speers, 1609 W. Kiowa St., at 8 a.m. Register with the leader, Mrs. Marjorie Leavens, 633-7605.

Real Estate Material Goes Into Library

The Colorado Springs Public Library has received a donation of materials relating to real estate appraisals and evaluations, it was announced today by Mrs. Margaret Reid, city librarian.

Initial presentation of the materials was made by the Southern Colorado Chapter of the Society of Real Estate Appraisers.

Thomas B. Ricker, chairman of the library committee of the Society, said the organization planned to donate additional books and materials from time to time so that a small but comprehensive library on evaluation of real estate can be established.

Such a collection has been badly needed for some time, Mrs. Reid said, "and will be a distinct asset to the library and the community."

CC Librarian, Dr. Mason, Goes To New Post

(Continued From Page One)

Literature from Yale University

He received both his bachelor's and master's degrees from Yale and also served as an English instructor at CC.

Prior to coming to CC, Dr. Mason served in the reference department at Yale; was serials librarian at the University of Wyoming and helped to recatalog the library at Montana State College. He formerly taught English at Williams College and at Marlboro College.

He is member of various library and historical associations including the American Library Association and the Association of College and Reference Libraries. Hofstra College has an enrollment of 8,600 students.

Police Report Thefts From Cars

Three cases of larceny from motor vehicles were reported today by Colorado Springs police.

Doris Lorraine Berry, 2519 W. Pikes Peak Ave. told police that tires, tubes and a battery worth

"A Communist plot staged by a total of \$48 were removed from some Communists and agents to her car between May 15 and June 1. The camp at Rashid camp was crushed while it was parked in a military forces, the national guard.

In another case, a tire and the police and the people," a car wheel was stolen from the car of John B. Coates, 2434 Lark Dr., Monday night.

The car was parked in front of the fire.

In the third case, Gene Andrew Lacour, 810 E. Rio Grande St., told police that two tires and wheels worth \$60 were stolen from his car while it was parked behind Conley's Garage, 725 E. Fillmore St. Monday night.

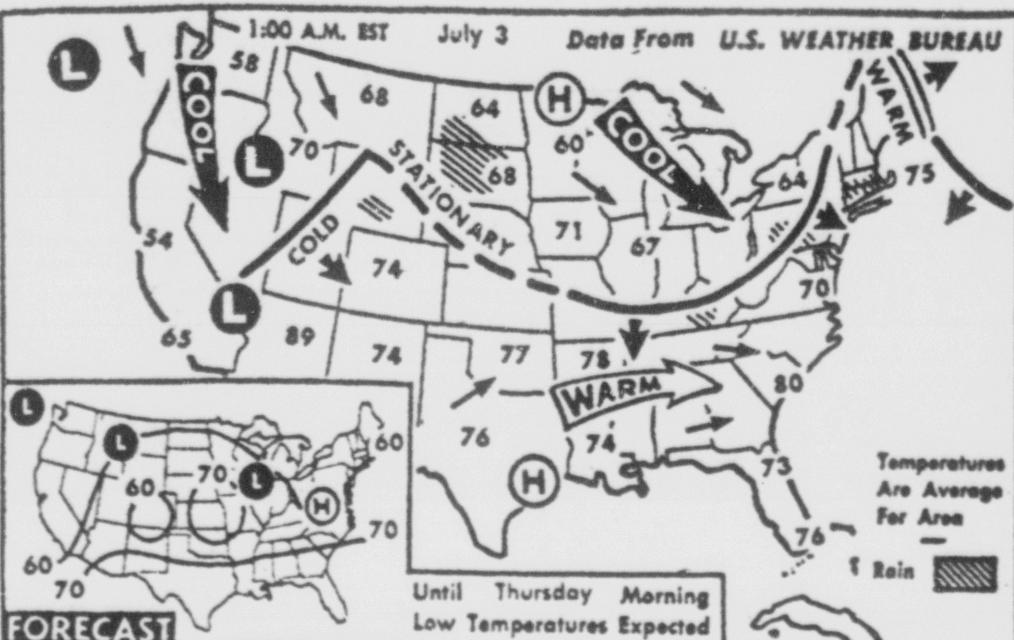

Cigaret Tax Receipts Doubled

Gross receipts from the city's cigarette tax was almost double in 1962, it was reported today by James O'Leary, deputy city treasurer.

This year's June total was \$15,855.60 as compared with \$8,654.20 for June, 1962.

Similarly, O'Leary said, the total for the first six months of 1963 is \$69,431.60, which compares with \$40,995.20 for the first half of 1962.

The increase is due to the fact Drawing Room A request that the City Council increased high mass will be celebrated at the cigar tax from one to two three minutes before 9 a.m. Friday at the Corpus Christi Church. The Rev. Msgr. Anthony G. Elia will be in charge. Burial will be in the St. Michael Cemetery, Denver.

HINTS FROM
Heloise

By HELOISE CRUSE

Dear Homemaker:

Let's talk about covering our dining room chairs today. You can do it yourself. It's inexpensive, it's easy and it's quick.

All you have to do is turn the chair upside down, remove the little screws in each corner, and the seat comes loose.

Remove it and lay it on your material and draw a pattern, allowing a few inches to turn under.

If you have a stapler . . . use it! It's great and quicker than tacks and saves mashed fingers. If you don't have one, use your hammer and tack the material to the seat. Replace the seat and screws and presto . . . it's beautiful!

If your dining room chair has cushioned backs, I have found it best to pull the gimp loose as it is usually glued on. Either remove the old material from the back, or cut a pattern by holding a piece of foil over the material and mashing it with your finger nail. A perfect pattern will result. Make your pattern and then cut your material. Replace on chair back and either tack or staple on the fabric.

Replace the same gimp with some good glue. It is not necessary to buy new gimp. It usually lasts for years and years.

I do not always rip off the old upholstery on my dining room chairs. I just apply the new material over the old. This gives it more cushion.

But . . . and here's the real tip . . . while you are covering those chairs put two pieces of fabric over the SEAT!

Here's why:

The seat of the chair always gets soiled before the back does. We figure about twice as fast. So, when the seat cover becomes so soiled that it must be replaced again (but then you won't be able to match your material) just remove the top cover!

I feel that the soil will work down through the top layer just enough so that when the top cover is ripped off, it will exactly match the back of the chair. At least we found it so.

So look for some fabric on sale and cover your dining room chairs. And it's worth the few extra dollars to get enough material to cover the seats twice. —Love, Heloise

Dear Heloise:

Lemon juice is just wonderful for removing stains on the fingers. Squeeze the juice of a lemon into a very small container and soak your fingers in it.

You will find that the cuticle may be pushed back with ease and the juice is also good for fingers. Afterwards gently brush with mild hand soap and warm water and rinse well. Use your favorite hand cream and just see the difference.

This can usually be done during the interval of waiting in the kitchen while preparing a meal as it takes only a very few minutes. —Dixie Parker

Dear Dixie:

Many manicurists have written to us saying that lemon juice is the finest there is for removing stains. —Thank you, Heloise

Dear Heloise:

Another use for your old bath towels — besides your Heloise blouse — is to bind the edges with bright colored bias tape, put elastic loops on the corner and you have a bathmette or "changing" table cover! And, if you have looked at the price of ready-made bathmette covers lately . . . you will run for the sewing notions counter and make a half a dozen yourself!

Another baby hint: Fill an odd sock with some navy beans, tie a knot in the middle of the foot — you can even embroider a face on it — and you have a perfect bean bag for your little one. I leave the "tail" on the bean bag. It's a wonderful handle for swinging it. —Lue Anne Robbins

Planning

By HENRY HAZLITT

From The Freeman

Irvington-on-Hudson, N. Y.
When we discuss "economic planning," we must be clear concerning what it is we are talking about. The real question being raised is not: plan or no plan? but WHOSE plan?

Each of us, in his private capacity, is constantly planning for the future: what he will do the rest of today, the rest of the week, or the weekend; what he will do this month or next year. Some of us are planning the in a more general way, ten or twenty years ahead.

We are making these plans both in our capacity as consumers and as producers. Employees are either planning to stay where they are, or to shift from one job to another, or from one company to another, or from one city to another, or even from one career to another. Entrepreneurs are either planning to stay in one location or to move to another, to expand or contract their operations, to stop making a product for which they think demand is dying and to start making one for which they think demand is going to grow.

Now the people who call themselves "Economic Planners" either ignore or by implication deny all this. They talk as if the world of private enterprise, the free market, supply, demand, and competition, were a world of chaos and anarchy, in which nobody ever planned ahead or looked ahead, but merely drifted or staggered along. I once engaged in a television debate with an eminent Planner in a high official position who implied that without his forecasts and guidance American business would be "flying blind." At best, the Planners imply, the world of private enterprise is one in which everybody works or plans at cross purposes or makes his plans solely in his "private" interest rather than in the "public" interest.

Now the Planner wants to submit his OWN plan for the plans of everybody else. At best, he wants the GOVERNMENT to lay down a Master Plan to which everybody else's plan must be subordinated.

IT INVOLVES COMPELSSION

It is this aspect of Planning to which our attention should be directed: Planning always involves COMPELSSION. This may be disguised in various ways. The government Planners will, of course, try to persuade people that the Master Plan has been drawn up for their own good, and that the only persons who are going to be coerced are those whose plans are "not in the public interest."

The Planners will say, in the newly fashionable phraseology, that their plans are not "imperative," but merely "indicative." They will make a great parade of "democracy," freedom, cooperation, and noncompulsion by "consulting all groups" — "Labor," "Industry," the Government, even "Consumers' Representatives" — in drawing up the Master Plan and the specific "goals" or "targets." Of course, if they could really succeed in giving everybody his proportionate weight and voice and freedom of choice, if everybody were allowed to pursue the plan of production or consumption of specific goods and services that he had intended to pursue or would have pursued anyway, then the whole Plan would be useless and pointless, a complete waste of energy and time. The Plan would be meaningful only if it forced the production and consumption of DIFFERENT things or different quantities of things than a free market would have provided. In short, it would be meaningful only insofar as it put compulsion on SOMEBODY and forced some change in the pattern of production and consumption.

There are two excuses for this coercion. One is that the free market produces the WRONG goods, and that only government Planning and direction could assure the production of the "right" ones. This is the thesis popularized by J. K. Galbraith. The other excuse is that the free market does not produce ENOUGH goods, and that only government Planning could speed things up. This is the thesis of the apostles of "economic growth."

THE "FIVE-YEAR PLANS"

Let us take up the "Galbraith" thesis first. I put his name in quotation marks because the thesis long antedates his presentation of it. It is the basis of all the communist "Five-Year Plans" which are now aped by a score of socialist nations. While these Plans may consist in setting out some general "overall" percentage of production increase, their characteristic feature is rather a whole network of specific "targets" for specific industries: there is to be a 25 per cent increase in steel capacity, a 15 per cent increase in cement production, a 12 per cent increase in butter and milk output, and so forth.

There is always a strong bias in these Plans, especially in the increased power to make war in all the Plans, however, even in noncommunist countries, there is a strong bias in favor of industrialization of heavy industry as against agriculture, as the be-

Vs. the Free Market

lief that this necessarily increases real income faster and leads to greater national self-sufficiency. It is not an accident that such countries are constantly running into agricultural crises and food famines.

But the Plans also reflect either the implied or explicit moral judgments of the government Planners. The latter seldom plan for an increased production of cigarettes or whisky, or, in fact, for any so-called "luxury" item. The standards are always grim and puritanical. The word "austerity" makes a chronic appearance. Consumers are told that they must "tighten their belts" for a little longer. Sometimes, if the last Plan has not been too unsuccessful there is a little relaxation: consumers can, perhaps, have a few more motor cars and hospitals and playgrounds. But there is almost never any provision for, say, more golf courses or even bowling alleys. In general, no form of expenditure is approved that cannot be universalized, or at least "majoritized." And such so-called luxury expenditure is discouraged, even in a so-called "indicative" Plan, by not allowing access by promoters of such projects to bank credit or to the capital markets. At some point government coercion or compulsion comes into play.

"THE NATION" CANNOT AFFORD IT

This disapproval and coercion may rest on several grounds. Nearly all "austerity" programs stem from the belief, not that the person who wants to make a "luxury" expenditure cannot afford it, but that "the nation" cannot afford it. This involves the assumption that, if I set up a bowling alley or patronize one, I am somehow depriving my fellow citizens of more necessary goods or services. This would be true only on the assumption that the proper thing to do is to tax my so-called surplus income away from me and turn it over to others in the form of money, goods, or services. But if I am allowed to keep my "surplus" income, and am forbidden to spend it on bowling alleys or on imported wine and cheese, I will spend it on something else that is not forbidden. Thus when the British austerity program after World War II prevented an Englishman from consuming imported luxuries, on the ground that "the nation" could not afford the "foreign exchange" or the "unfavorable balance of payments," officials were shocked to find that the money was being squandered on football pools or dog races. And there is no reason to suppose, in any case, that the "dollar shortage" or the "unfavorable balance of payments" was helped in the least. The austerity program, insofar as it was not enforced by higher income taxes, probably cut down potential exports as much as it did potential imports; and insofar as it was enforced by higher income taxes, it discouraged exports by restricting and discouraging production.

But we come now to the specific Galbraith thesis, growing out of the ailing bureaucratic suspicion of luxury spending, that consumers generally do not know how to spend the income they have earned, that they buy whatever advertisers tell them to buy, that consumers are, in short, boos and suckers, chronically wasting their money on trivialities, if not on absolute junk. The bulk of consumers also, if left to themselves, show atrocious taste, and crave cerise automobiles with ridiculous tailfins.

BEAUCRATIC CHOICE

The natural conclusion from all this — and Galbraith does not hesitate to draw it — is that customers ought to be deprived of freedom of choice, and that government bureaucrats, full of wisdom — of course, of a very unconventional wisdom — should make their consumptive choices for them. The consumers should be supplied, not with what they themselves want, but with what bureaucrats of exquisite taste and culture think is good for them. And the way to do this is to tax away from people all the income they have been foolish enough to earn above that required to meet their bare necessities, and turn it over to the bureaucrats to be spent in ways in which the latter think would do people the most good — more and better roads and parks and playgrounds and schools and television programs — all supplied, of course, by government.

And here Galbraith resorts to a neat semantic trick. The goods and services for which people voluntarily spend their own money make up, in his vocabulary, the "private sector" of the economy, while the goods and services supplied to them by the government, out of the income it has seized from them in taxes, make up the "public sector."

Now the adjective "private" carries an aura of the selfish and exclusive, the inward-looking. Whereas the adjective "public" carries an aura of the democratic, the shared, the generous, the patriotic, the outward-looking — in brief, the public spirited. And as the tendency of the expanding welfare state has been, in fact, to take out of private hands and more and more take into its own hands provisions of the goods and services that are considered to be most essential

and most edifying — roads and water supply, schools and hospitals and scientific research, education, old-age insurance and medical care — the tendency must be increasingly to associate the word "public" with everything that is really necessary and laudable, leaving the "private sector" to be associated merely with the superfluities and capricious wants that are left over after everything that is really important has been taken care of.

But the distinction between the two "sectors" were put in more neutral terms — say, the "private sector" versus the "government sector." The scales would not be so heavily weighted in favor of the latter. In fact, this more neutral vocabulary would raise in the mind of the hearer the question whether certain activities now assumed by the modern welfare state do legitimately or appropriately come within the governmental province. For Galbraith's use of the word "sector" — "private" or "public" — cleverly carries the implication that the public "sector" is legitimate, even in a so-called "indicative" Plan, by not allowing access by promoters of such projects to bank credit or to the capital markets. At some point government coercion or compulsion comes into play.

WHAT RATE OF GROWTH?

There is among the Growth Planners a profound mystical belief that they must "tighten their belts" for a little longer. Sometimes, if the last Plan has not been too unsuccessful there is a little relaxation: consumers can, perhaps, have a few more motor cars and hospitals and playgrounds. But there is almost never any provision for, say, more golf courses or even bowling alleys. In general, no form of expenditure is approved that cannot be universalized, or at least "majoritized." And such so-called luxury expenditure is discouraged, even in a so-called "indicative" Plan, by not allowing access by promoters of such projects to bank credit or to the capital markets. At some point government coercion or compulsion comes into play.

VOLUNTARY VERSUS COERCIVE

The true distinction, and the appropriate vocabulary, however, would throw an entirely different light on the matter. What Galbraith calls the "private sector" of the economy is, in fact, the VOLUNTARY sector; and what he calls the "public sector" is, in fact, the COERCIVE sector. The voluntary sector made up of the goods and services for which people voluntarily spend the money they have earned. The coercive sector is made up of the goods and services that are provided, regardless of the wishes of the individual, out of the taxes that are seized from him. And as this sector grows at the expense of the voluntary sector, we come to the essence of the welfare state. In this state nobody pays for the education of his own children, but everybody pays for the education of everybody else's children. Nobody pays his own medical bills, but everybody pays everybody else's medical bills. Nobody helps his own old parents, but everybody else's old parents. Nobody provides for the contingency of his own unemployment, his own sickness, his own old age, but everybody provides for the unemployment, sickness, or old age of everybody else. The welfare state, as Bastiat put it, with uncanny clairvoyance more than a century ago, is the great fiction by which everybody tries to live at the expense of everybody else.

THE WAY TO GET A MAXIMUM RATE OF "ECONOMIC GROWTH" — assuming this to be our aim — is to give maximum encouragement to production, employment, saving, and investment. And the way to do this is to maintain a free market and a sound currency. It is to encourage profits, which must in turn encourage both investment and employment. It is to refrain from opulence that siphons away the funds that would otherwise be available for investment. It is to allow free wage rates that permit and encourage full employment. It is to allow free interest rates, which would tend to maximize saving and investment.

THE WRONG POLICIES

The way to SLOW DOWN the rate of economic growth is, of course, precisely the opposite of this. It is to discourage production, employment, saving, and investment by incessant interventions, controls, threats, and harassment. It is to frown upon profits, to declare that they are excessive, to file constant antitrust suits, to control prices by law or by threats, to levy confiscatory taxes that discourage new investment and siphon off the funds that make investment possible, to hold down interest rates artificially to the point where real saving is discouraged and malinvestment encouraged. It is to allow free wage rates that permit and encourage full employment. It is to allow free interest rates, which would tend to maximize saving and investment.

THE WRONG PLANNERS

The way to be a failure is to be bound to be a failure. This is sure to be the outcome whenever effort is separated from reward. When people who earn more than the average have their "surplus," or the greater part of it, seized from them in taxes, and when people who earn less than the average have the deficiency, or the greater part of it, turned over to them in handouts and doles, the production of all must sharply decline, for the energetic and able lose their incentive to produce more than the average, and the slothful and unskilled lose their incentive to improve their condition.

THE GROWTH PLANNERS

I have spent so much time in analyzing the fallacies of the Galbraithian school of economic Planners that I have left myself little in which to analyze the fallacies of the Growth Planners. Many of their fallacies are the same; but there are some important differences.

The chief difference is that the Galbraithians believe that a free market economy produces too much (no, of course, they are the "wrong" goods), whereas the Growthmen believe that a free market economy does not produce nearly enough. I will not here deal with all the statistical errors, gaps, and fallacies in their arguments, the analysis of these alone could occupy a fat book. I want to concentrate on their idea that some form of government direction or coercion can be by some strange magic increase production above the level that can be achieved when everybody enjoys economic freedom.

Their recipe for inducing growth always turns out to be inflation. This does lead to the ILLUSION of growth, which is measured in their statistics in monetary terms. What the Growthmen do not realize is that the magic of inflation is always a short-run magic, and quickly played out. It can work temporarily and under special conditions — when it causes prices to rise faster than wages and so restores or expands profit margins. But this can happen only in the early stages of an inflation which is not expected to continue. And it can happen even then only because of the temporary acquiescence or passivity of the labor union leaders. The consequences of this short-lived inflation are malinvestment, waste, a wanton redistribution of wealth and income, the growth of speculation and gambling, immorality and corruption, social resentment, discontent and upheaval, disillusion, bankruptcy, increased government controls, and eventual collapse. This is the shared, the patriotic, the outward-looking — in brief, the public spirited. And as the tendency of the expanding welfare state has been, in fact, to take out of private hands and more and more take into its own hands provisions of the goods and services that are considered to be most essential

and most edifying — roads and water supply, schools and hospitals and scientific research, education, old-age insurance and medical care — the tendency must be increasingly to associate the word "public" with everything that is really necessary and laudable, leaving the "private sector" to be associated merely with the superfluities and capricious wants that are left over after everything that is really important has been taken care of.

But along comes the Growth Planner. He finds by statistics (whose trustworthiness and accuracy he never doubts) that the economy has been growing, say, only 2.8 per cent a year. He concludes, in a flash of genius, that a growth rate of 5 per cent a year would be faster. How does he propose to achieve this?

Management Study

From Monthly Letter
Royal Bank of Canada

It is necessary in the convulsive scene of business life to assign proportions to our problems and to set up priorities. Clearing up mechanical difficulties is different from reaching a decision on a course of action which involves people, budgets, and markets.

"There is no way to be sure how much credit is due the French plans in themselves for that country's impressive 4.5 per cent average annual growth rate over the past decade. Other factors were working in favor of growth: a relatively low starting level after the wartime destruction. Marshall Plan funds in the early years, later an ample labor supply siphoned from agriculture and from obsolete or inefficient industries, most recently the bracing air of foreign competition let in by liberalization of import restrictions, the general dynamism of the Common Market, the break-thru of demand. For the fact that France today has a high degree of stability and a strong currency along with its growth, the stern fiscal discipline applied after the devaluation of late 1958 must be held principally responsible.

This involves forethought. The manager is subject to one trial not common to the worker: he has the continual feeling of incompleteness. His job is never done. His energy drives him to consider the cases of West Germany and Italy, which have sustained high growth rates without national planning of the economy." In brief, statistical estimates of growth rates, even if we could accept them as meaningful and accurate, are the result of so many factors that it is never possible to ascribe them with confidence to any single cause. Ultimately we must fall back upon an a priori conclusion, yet a conclusion that is confirmed by the whole range of human experience: that when each of us is free to work out his own economic destiny within the framework of the market economy, the institution of private property, and the general rule of law, we will all improve our economic condition much faster than when we are ordered around by bureaucrats.

There is no necessary virtue in "planning" itself. Its value depends upon what the plan is for, what ends it will serve, what difficulties it is designed to overcome — difficulties arising from the caprices of fate, the actions of competitors and the quirks of human nature. Without a plan, fluid tho it may be, we cannot reach decisions intelligently.

An umpire must call the strikes and balls as he sees them, instantly. But mere speed in coming to decisions may have small relevance at the top business management level where a man's contribution to the enterprise may be the making of two or three significant decisions a month.

This is not to say that we should debate and stew over every problem. We are probably too much given to sending out a man with a red flag in front of every new idea as they used to do with steam locomotives. On the whole, it is wiser to make a decision promptly and crisply after giving the matter adequate thought than to linger over it and lose momentum and drive.

To make a sound decision it is not necessary to have all the facts, but it is necessary to know what facts are missing so that we may make allowance for the gap and decide the degree of risk to take.

Some managers, in trying to avoid off-the-cuff masterminding, make it a practice to take time to sleep on a problem. This can be useful if a tentative decision has been reached or workable alternatives outlined so that the subconscious has something tangible to push around.

Very little that is good can be said about procrastinating. Any business will become paralyzed if there are persistently long delays in the making of managerial decisions. They cause waste of time among personnel, loss of team-work, and forfeiture of faith in management.

Excuses for postponing a decision are not hard to find. Recall the hesitancy of Hamlet. One moment he pretended that he was too cowardly to perform the deed, at another he questioned the truthfulness of the ghost, at another he thought the time was unsuitable, that it would be better to wait until the king was at some evil act and then to kill him, and so on. Every reason had a certain plausibility, but it would not stand serious consideration.

There are, of course, times for postponement, when a resolute determination to take no action until more facts are available is a constructive contribution to wise decision. The warning is against unwise or frivolous putting off. We must keep in mind that to make no decision is itself a decision, and must be justified.

Effective use of postponement was made by Penelope in Homer's "Odyssey." During the protracted absence of her husband, Ulysses, Penelope was besieged by suitors for her hand in marriage. She put them off for several years by telling them that she would give her decision when the burial cloth on which she was working was complete. Then she undid by night what she had woven by day, and so staved off decision. Ulysses returned and drove out the suitors.

The Communists teach peaceful coexistence only until such time as the enemy can be destroyed. Khrushchev's plea for that policy is nothing more or less than the application of Stalin's doctrine.

It is the same with the self-determination of the nation.

Recognizing their rights and fighting for it, we are at the same time fighting against all rights of the nations which are not in harmony with the interest of the proletarian.

The Communists teach peaceful coexistence only until such time as the enemy can be destroyed.

Oils, Airlines Reported Strong In Market Rally

NEW YORK (AP) — Oils and some airlines were strong as the stock market continued to rally early this afternoon in active trading.

Stocks carried through their recovery of the previous session and first-hour trading topped a million shares for the first time in several sessions.

The steel and building material issues were mixed.

Big three motors, chemicals, rails, utilities, tobacco, electrical equipment, drugs, farm implements, and mail-order-retails were mostly higher.

The Associated Press average of 60 stocks was up 1.0 to 27.6, with industrials ahead 1.6, rails up 5, and utilities up 3.

Texaco and Universal Oil Products gained about a point, Jersey Standard and Royal Dutch fractions.

Pan American World Airways and National Airlines were each up more than a point.

IBM, up about 4, continued a vigorous rebound.

Polaroid and Xero each gained more than 2.

The Dow Jones industrial average at noon rose 4.9 to 213.23.

Prices moved irregularly higher on the American Stock Exchange.

Corporate bonds were narrowly

ment bonds were shade higher.

Building to Be Started Soon for North End Bank

Construction is expected to start in the next few days on a one-story building in the 200 block of East Fillmore Street for the Northern National Bank, which recently received approval by the U.S. comptroller of the currency for a charter.

The tentative number for the building is 220 E. Fillmore St. on property owned by Genetics Hawthorne and the First National Bank of Colorado Springs.

No announcement has been made as to when the new bank will be opened.

The bank, the ninth commercial bank in Colorado Springs, will have capital of \$250,000, surplus \$75,000 and undivided profits \$75,000.

Organizers of the bank are Samuel A. Robinson, land owner; Egmont Vrooman, building contractor; Fillmore S. Bigson, attorney; Kenneth O. Brebeisen, medical center manager, and Darwin D. Wooley, all of Colorado Springs; Albert L. Ladd Jr., Pueblo lumber yard owner, and A. B. Armstrong, Manitou Springs restaurant owner.

No officers for the bank have been named.

HITCHCOCK'S NEXT FILM

WON'T STAR TALLULAH

HOLLYWOOD — Called Alfred during this girl for a month, so Hitchcock to check the story that people started writing things. I'm Tallulah Bankhead would be in not about to marry for awhile.

Jim called his mother in London to tell her this so she wouldn't worry. His dad won't be finished over there until September.

He's still dickered with Anita Ekberg and Ursula Andress to join his next picture.

"No," he said, "I haven't seen her since 'Lifeboat' 20 years ago. She gave Walter Slezak a rough time during that one. They sat opposite each other in the lifeboat and after each take, she gave him the business about being German. Paula Strasberg was her constant companion then."

"What do you think of method actors?" I asked.

"They're all right, but I've never seen one in white tie and tails. No real elegance. We need ladies on screen. We used to have Vine street. Tourists are flocking plenty — Carole Lombard, Irene Dunne, Myrna Loy, Norma Jeane. Sheerar, I call those downbeat give in to Sally Frederic, on films sink-to-sink pictures. Their new home, until it came to wife's home washing dishes: her his room; then he put his foot in the door. Electronics and various space age devices have increased the use of the metal. Affluent societies both here and abroad have increased their buying of household and other silver objects. And the number of silver coins needed for vending machines, turnstiles and generally higher consumer purchases has put a strain on many nations' mints.

Character Tries Out His Own Funeral March

TAOS, N.M. (AP) — The late Steven Carroll (dough Belly, Price, 66, self-proclaimed character who named his real estate office "doughBelly's Clip Joint," on June 11 had the kind of funeral procession he had always wanted.

His body was dressed, as in life, in white shirt, blue jeans and boots and he was holding a black Stetson. The tag from a bag of Bull Durham showed from his shirt pocket, doughBelly always rolled his own.

From the funeral chapel, the casket was borne to Sierra Vista Cemetery in an old, open wagon, drawn by a horse. A riderless horse, with boots hanging from the saddlehorn, followed behind.

Friends lined the route of the procession.

The church was organized in 1840, four years after the tribe was pushed from Ohio and Michigan into Kansas. At that time he was known. He said that in his years as a cow camp cook, his round little belly" was usually covered with flour and dough.

He had written his autobiography, "Short Sturrs," and for some years had written a weekly column in The Taos News.

DEAGREE OVER LAOS

WASHINGTON (UPI) — The State Department does not believe a new 14-nation conference on Laos is needed despite a British report Monday that talks with Russia on Laos have broken down.

His body was dressed, as in life, in white shirt, blue jeans and boots and he was holding a black Stetson. The tag from a bag of Bull Durham showed from his shirt pocket, doughBelly always rolled his own.

From the funeral chapel, the casket was borne to Sierra Vista Cemetery in an old, open wagon, drawn by a horse. A riderless horse, with boots hanging from the saddlehorn, followed behind.

Friends lined the route of the procession.

The church was organized in 1840, four years after the tribe was pushed from Ohio and Michigan into Kansas. At that time he was known. He said that in his years as a cow camp cook, his round little belly" was usually covered with flour and dough.

He had written his autobiography, "Short Sturrs," and for some years had written a weekly column in The Taos News.

ONCE WAS WET SAHARA

Evidence that the Sahara Desert—especially in southeast Algeria—may have had a more abundant rainfall and been more verdant in ancient times has been uncovered in rock paintings first unearthed in 1933.

Paintings found in the Tassili area cover four periods of local life, with matching subjects: first, hunters and wild buffalo; second, cattle pastoralists; third, chariots and cavalry; and fourth, the camel and the arid desert.

WHO'S THE REAL CULPRIT?

LONDON (AP) — The British government has appointed a special committee to investigate garbage collecting.

A government announcement said the committee would also "see how far refuse collection methods are in themselves causing litter in the street."

Price of Silver Surpasses Value Of Metal in Coins

By SAM DAWSON

AP Business News Analyst
NEW YORK (AP) — The price of silver on the futures market in London has been pushed above the monetary value of U.S. government stocks. The cash price in New York has risen this week to a whisker of the official price.

But don't start melting down your silver coins. They're worth more as they are in the metals market.

The U.S. Treasury has enough silver on hand to maintain its official valuation thanks to the recent direction by Congress to stop backing \$1 and \$2 bills with the metal.

The Treasury can use this released board for its increasing coinage needs without competing with other consumers in the London market.

Silver dealers say the Treasury stock hangs over the market to prevent any runaway prices for industrial or art uses here at home — although consumers are resigned to having to pay more for their supplies.

The price rose on the world markets—and steadily mounting demands that back that increase—comfort many mining operators in the United States. Since this amount, 58.2 per cent was

verus becomes for them a profitable by-product of their main lines of copper, lead and zinc—and at a time when lead and zinc prices themselves are firming.

The spot price for silver on the

pricing London market rose on Tuesday to \$1.292 an ounce. For August delivery the price in Colorado Springs agency, this was \$376.00 higher than in 1961 and \$1.2 million higher than in 1960. The total at the end of 1962 included more than \$27.1 million in moneys, \$13.6 million in stocks and bonds and \$2 million in policy

joins.

In addition, the life and health insurance company paid Colorado residents \$2.7 million in insurance benefits of all kinds in 1962.

According to Leo E. Quinlan,

manager of MONY's Colorado

Springs agency, this was \$376.

00 higher than in 1961 and \$1.2

million higher than in 1960. The

total at the end of 1962 included

more than \$27.1 million in moneys,

\$13.6 million in stocks and

bonds and \$2 million in policy

joins.

They do these things by night

because their time is scarce and

expensive. Their daytime hours

must be put to more practical

uses. The latest British computer,

Atlas, built by Ferranti and

used by Manchester University Com-

puter, costs \$2,000 an hour to

run.

Electronic computers can cope

with an amazing range of mathemat-

ical problems. They can calculate

the stresses on an aircraft's wings

while it is still on the drawing

board, solve economic prob-

lems such as the most economic

way of distributing goods from a

number of plants, calculate

wages, produce life expectan-

cy tables for insurance firms, ana-

lyze surveys and predict election

results.

At the end of 1962, MONY had

\$96.3 million of individual and

group life insurance in Colorado

to \$1.297 or higher, with as

much as \$1.3065 an ounce bid for

delivery in June 1964.

The monetary value of the U.S.

government's silver stocks is \$1.

28 an ounce. In New York, the

cash price was lifted by dealers

0.3 cent an ounce Monday to \$1.

28.

The spurt in price this week

was credited to active buying in

London due to increased demand by some European nations for

both coinage and industrial uses.

Consumption of silver world-

wide has been running well above

mine output. Electronics and vari-

ous space age devices have in-

creased the use of the metal. Af-

fuent societies both here and

abroad have increased their buy-

ing of household and other silver

objects. And the number of silver

coins needed for vending ma-

chines, turnstiles and generally

higher consumer purchases has

put a strain on many nations'

mints.

The spot price for silver on the

pricing London market rose on

Tuesday to \$1.292 an ounce.

For August delivery the price in

Colorado Springs agency, this was

\$376.00 higher than in 1961 and

\$1.2 million higher than in 1960.

The total at the end of 1962 in-

cluded more than \$27.1 million in

monies, \$13.6 million in stocks and

bonds and \$2 million in policy

joins.

Drivers From Coast to Coast All Set to Roar Up Mountain

annual affair is divided into three divisions: championship, limited to 270 cubic inch engines; stock cars, 428 cubic inch limitation; and sports, which is open to all sports cars from 0-8,000 cc.

Three time trial records were established last Tuesday. Bobby Unser, who will be seeking his sixth consecutive victory in the championship division, rammed his 327 cubic inch powered Chevrolet racing vehicle over the six-mile time trial stretch in five minutes and 23.8 seconds; this broke his own record by 10.6 seconds.

Parnelli Jones, the 1963 Indianapolis 500-mile record-breaking winner, climbed the rugged terrain to claim a new mark for the stock car division.

At precisely 11 a.m., the race will commence and continue with three-minute intervals. The leadout specialists will roar up the 12.42 mile course, composed of some 166 rugged curves seeking fame and fortune. Managing director J. C. Agajanian has assured a \$22,000 purse to the drivers from Roanoke, Va., to Pico River, Calif., entered in the 41st annual Pikes Peak Hill Climb.

At precisely 11 a.m., the race will commence and continue with three-minute intervals. The

to promote the Hill Climb and Sears' tires and other automotive products. Sears purchased the 1963 Ford 500 Galaxie so Agajanian can drive it at various races which he promotes in addition to his usual town and country driving.

Planners Meeting Set July 11 at City Auditorium

Osborn Family at Brush Win Land Title Contest

Mr. & Mrs. Milo A. Osborn of Withrow, president from Ft. Col-Brush, Colorado were named winners in the statewide contest con-

ducted by the Land Title Association of Colorado.

Purpose of the contest was to honor families in Colorado that had held title to a piece of land in the same family name for the longest continuous period of time.

George H. Reese to change 800 S. 8th St. from the R-2 (single-family residential) to the C-6 (general business) zone.

Robert C. Screws to change 212 N. Meade St. from the R-3 (two-family residential) to the R-5 (multi-family residential) zone.

Everett Conover to change the northeast corner of Palmer Park Boulevard and Yuma Street from the R-5 to the C-4 (neighborhood business) zone.

Robert C. Stanifer to change the east side of the 100 block of North Bonfry Avenue from the R-2 to the R-5 zone.

William J. Chestnut to change the southeast corner of Platte and Weber Streets and the southwest corner of Monroe and Weber Streets from the R-3 to the R-5 zone.

Arthur J. Feild to change the northwest corner of Madison and Weber Streets and the southwest corner of Monroe and Weber Streets from the R-3 to the R-5 zone.

R. D. VonEngeln to change the east side of the 300 block of South Wahsatch Avenue from the R-5 and M-1 to the M-1 (light industrial) zone.

Knickerbocker Development Corp. to change 1101 S. Institute St. from A-1 (garden homes) to the R-5 zone.

Concord Corp. to change the east side of the 1300 block of North McArthur Avenue from the R-2 to the R-3 zone.

Concord Corp. to change 2525 through 2707 W. Kiowa St. from the R-3 to the R-5H (multi-family residential high rise) zone.

Fred H. Kemmer to change the northeast corner of Chestnut and Jefferson Streets from the R-3 to the C-4 (neighborhood business) zone.

Century Realty and Investment Company Inc. to change block C, Meadowland Addition No. 1, located on the north side of Templeton Gap Road between Meadowland Boulevard and Goldenrod Drive from the R-2 to the R-5 zone.

Tudor J. Marks to change 124 and 138 W. Uintah St. and 1206 Wood Ave. from the R-1 to R-4 (light industrial residential) or SU-1 (special use No. 1) zone.

Approximately 15 sailplanes will be used with two tow planes used for launching operations.

Due to the excellent soaring conditions at the foot of Mt. Princeton, alpine soaring over the Continental Divide will be the feature event.

The 1964 expedition is tentatively planned for Aspen.

Group to Host Soaring Event To Buena Vista

The Pikes Peak Soaring Assn. will host the Annual Soaring expedition to Buena Vista beginning Thursday mornings and ending Sunday at the Buena Vista Municipal Airport.

A large representation is expected to participate from the Denver and Boulder Soaring Clubs in addition to clubs from New Mexico, Oklahoma, Kansas (light industrial residential) or SU-1 (special use No. 1) zone.

John O. Smith to change 1616 N. Circle Drive from the R-2 to the R-3 zone.

Preliminary plat of Austin Estates Subdivision No. 5, filing No. 1, by Edwin W. Hays, which is a 14.60 acre tract southwest of Rigel and Orion Drives.

Petition by M. D. R. Inc. requesting annexation of a 119.6 acre tract north of Templeton Gap Road about three quarters of a mile west of Academy Boulevard.

Petition by Sproul Hanes requesting annexation of 316.24 acres lying east of South Circle Drive and south of Airport Road.

Amendment to the development plan of Palmer Heights Shopping Center.

Petition by Elroy Sturm to an-

area 30 acres northeast of South Circle and North Circle Drive.

Amendment to the development plan of Academy Shopping Cen-

ter.

Trees and Shrubs Can Be Planted All Year-Round

Twenty or 30 years ago it was the general conception that planting or landscaping of property could only be done in the spring months.

However, the Colorado Springs Nurserymen's Assn. says this has completely changed and today planting and landscaping can be done all year long unless the frost is so deep that it makes it too difficult to plant.

The methods for transplanting trees and shrubs from nurseries to home properties has changed that cows are milkier if there is music piped into their barns.

The plants are kept in containers in the summer months so the home owner does not disturb the roots in transplanting to his property. Adequately balled and burlapped plants receive special care in the nursery for summer planting. Plant hormones are widely used to enhance the growth of newly-set-out trees and shrubs.

So if you desire to plant this summer, go right ahead and do so, advises the association, so since they should make such a long as you purchase from a source which has given the plants pre-planting treatment or care for this purpose.

Chicago radio station WAIT de-

serves to determine what kind of music the cows liked best. A ser-

ious oversight, you must admit,

thus gave more milk. It might

mean a great deal to the nation's

economy. With a little imagina-

tion, you can see what a cow's musical taste could do to Wall Street, especially the bulls.

Anyhow, WAIT figured the best way to do this would be to take

NO JOKE: Cows are in the m-o-o-d for music.

How to cure a sick lawn -without painful surgery!

PLAGUED BY BALDING SPOTS OF TURF?...SPREADING PATCHES OF DYING GRASS?...MOTH-EATEN SECTIONS OF LAWN? DESPAIR NO LONGER!-ORTHO HAS DEVISED TWO MIRACLE SPRAYS THAT GIVE FAST AND LASTING RELIEF FROM THE MISERIES OF LAWN CARE.

Now, without tedious waiting, without cumbersome spreaders, you can halt the spread of dying grass that used to mean the beginning of the end. ORTHO has just what the doctor ordered...and all you do is spray! But before you proceed with the operation, you must diagnose the case.

DO-IT-YOURSELF DIAGNOSIS

You can do it yourself right from your own lawn chair. First look for insect signs. Cream-colored moths hovering at dusk; orange butterflies flying by day. Or check the grass itself. You may find pencil-sized holes leading down to grass roots or white grubs chewing at the base of the blades. If you find none of these, then the plague is probably lawn disease-any one of five or six that can strike Western lawns in the summer and early fall.

RX: DIBROM

Now for the cures. First a spray that goes down deep...gives fast, fast relief from lawn insects: DIBROM Lawn Spray. Minutes after you spray your lawn, you'll see insects boil up out of the grass and die...before your very eyes. Because DIBROM not only kills lawn insects on contact; its vapor is very irritating to them. Hurrying to escape the irritation, they shoot to the surface, right smack into the DIBROM that does 'em in. Then they dry up and blow away, taking with them the threat of a lush turf turned to tatters. And "they" is the who's who of lawn insects: lawn moth, cutworms, armyworms, wireworms, leafhoppers and thrips.

RX: LAWN FUNGICIDE

For lawn diseases, ORTHO has devised a dandy that takes care of most major diseases that plague Western lawns. Brown patch, melting

out, grease spot, dollar spot, fading out and fusarium patch. It's name: ORTHO Lawn Fungicide, with not one but three fungicides in it. It even contains iron so it corrects chlorosis (yellowing of the grass.)

NOW FOR THE OPERATION

It couldn't be simpler. No scalpel. No forceps. No cumbersome spreaders. All you do is spray. You spray DIBROM with the ORTHO Lawn Sprayer; ORTHO Lawn Fungicide with the Spray-Ette. The sprayers do all the diluting automatically so you always apply the right amount. The cost of the operation is reasonable, too. You can treat over 1000 square feet of lawn with ORTHO Lawn Fungicide for less than 75¢ and with DIBROM for less than \$1.25.

PROGNOSIS:

A healthy, lush green lawn all summer long, undamaged by insects or disease. The kind of lawn you worked and watered and fertilized to get. Just proves what we always say. If you've got any problem with your lawn or garden, see the doctor. He's the fellow with the rows of red-and-yellow bottles, boxes and cans: your authorized ORTHO dealer.

Actually, this is no joke. It's the start of a very serious scientific experiment. And it may have tremendous implications for done all year long unless the frost is so deep that it makes it too difficult to plant.

The methods for transplanting trees and shrubs from nurseries dairy farmers have discovered to home properties has changed that cows are milkier if there is

music piped into their barns. So the plants are kept in containers in the summer months so the home owner does not disturb the roots in transplanting to his property. Adequately balled and burlapped plants receive special care in the nursery for summer planting. Plant hormones are widely used to enhance the growth of newly-set-out trees and shrubs.

So if you desire to plant this summer, go right ahead and do so, advises the association, so since they should make such a long as you purchase from a source which has given the plants pre-planting treatment or care for this purpose.

Chicago radio station WAIT de-

serves to determine what kind of music the cows liked best. A ser-

ious oversight, you must admit,

thus gave more milk. It might

mean a great deal to the nation's

economy. With a little imagina-

tion, you can see what a cow's musical taste could do to Wall Street, especially the bulls.

Anyhow, WAIT figured the best way to do this would be to take

NO JOKE: Cows are in the m-o-o-d for music.

four cows and give them a taste of different music. And, naturally, you'd want to conduct such a vital experiment where everybody could see it. Where else but a department store window big enough for four cows?

Rancher Writes Beef Guidebook For Cattlemen

The man who created the unique "Ranch Analyzer System" has just finished a book which broadens this system to universal use by beef herd owners and managers.

Authored by veteran rancher and management consultant Bill Smutz of Denver, the book hits at the very core of ranching for sensible wages and investment returns.

In its 110 pages of terse prose and detailed charts a commercial cattlemen or purebred operator will find nuggets of information on tight herd costs and performance control—plus some provocative comments on the cattle and beef industry in general.

Smutz, 42-year-old former World War II bomber pilot, put nearly 20 years of ranching and professional management experience into devising his original "Ranch Analyzer System" of year-around and year-to-year ranch management.

Although at first glance the System's records and forms looked complicated, users in 31 states and several foreign countries have found it a simplified method of determining where their herds have been, where they are now and where they can go profitably.

Smutz describes the System as a "management process which lets the rancher see truth about all factors of the ranch business."

"It makes it easy to capture critical management intelligence" about all essential matters in time for it to do some good," Smutz said.

The new book is entitled "The Ranch Analyzer System of Beef Management" and, as explained by Smutz, it is designed to enable large or small herd operators to use the System any place in the world by themselves. Smutz explains, however, that System services will continue to be provided as widely as possible in keeping with stringent professional standards.

Farmers Warned Of Leptospirosis Disease Season

With the maximum danger season for leptospirosis now here, farmers were warned today by authorities to keep livestock away from low, swampy pastures and slow moving streams.

These are the areas where farm animals are most likely to pick up this \$12 million a-year disease, according to the American Foundation for Animal Health. People can also pick it up by swimming in contaminated streams.

Best precaution for farmers to take to protect stock against "lepto" is to have a veterinarian vaccinate in advance of an outbreak. Today's leptospirosis vaccines give good immunity when properly administered, says the Foundation.

In both cattle and swine, the disease causes abortions. This may lead the farmer to confuse it with brucellosis unless an accurate diagnosis is obtained.

The foundation recommends that stock be kept out of low swampy pastures and slow-moving streams and that feed and watering facilities be protected against contamination, and that in known area of infection cattle and swine be kept separated.

Prize Arabians In Spotlight At Estes Park

Indoor Garden Provides Beauty, Cheer for Home

By VIVIAN BROWN
AP Newsfeature Writer

A million dollars worth of prize horses will be exhibited at the rodeo grounds in Estes Park Thursday thru Saturday at the 13th Annual Colorado All-Arabian Horse Show.

Show officials term the event as the established, greatest All-Arabian show in the midwest and one of the top shows in the nation.

A capacity crowd is expected for the five performances which will be presented at 1:30 p.m. and 8 p.m. on Thursday; 8 p.m. on Friday and 1:30 p.m. and 8 p.m. on Saturday. Admission charge is \$1.50 for adults and 75 cents for children. Box seats will be available at the rodeo arena for \$2.50.

The program includes specialty acts; trailer race, cutting contests, performance and halter classes and the colorful Mounted Native Costume class.

Entries thus far include exhibitors from Kansas, Utah, New Mexico, Wyoming, Texas and Colorado.

Colorado exhibitors with a large number of entries include Dick Newman's Arabian Heights Farm, Goldie; Bettis Circle 2 Arabians, Parker; Lee Petty, Pueblo; the Van Vleet Arabian Stud, Boulder, and Arabian, Boulder.

The show is co-sponsored by the Colorado Arabina Horse Club and the Estes Park Horse Show and Rodeo Assn.

Drought Tips

By Forest McWilliams
County Extension Agent

There are important but difficult decisions to make in periods of stress such as drought. Factors to consider include financial position, available feed supply, outlook as far as the cattle and sheep price situation, and future feed outlook costs.

The following alternatives should be appraised and the best possible decision made:

1. One alternative is to completely liquidate the herd. The increased feed costs for 1963-64 can wipe out many herd profits.

2. Another alternative is to reduce the size of the herd through culling cows. IRC Section 1033 of the Federal Income Tax Code permits the farmer or rancher to sell more of his breeding stock than he would normally sell — solely because of drought — the excess number is treated as an involuntary conversion.

No gain is recognized if he reinvests in similar animals before the end of the next year. Special permission can be obtained to extend the replacement deadline.

3. It is important to look at alternative markets. Areas which have abundant feed and pastures usually offer good potential markets such as the corn belt.

4. Push a pencil to figure your cheapest but adequate rations for livestock.

5. Base applications of fertilizer on availability of water.

6. New machinery, automobiles, and equipment purchases must be kept to a minimum by many farmers and ranchers due to the reduced potential income and reduced repayment ability as a result of the drought and depressed cattle prices. Conferring with your farm credit lender on your credit needs and situation is imperative. A conference with your lender on major purchases can avoid weakening your credit.

Junior contestants must be 15 years of age or younger and senior events are for those 16 years or older. Six ribbons will be awarded for each event with trophies given to champion riders.

Casey Darnell will be the judge for the American Quarter Horse Assn. approved show. To be eligible for AQHA points, a horse must be exhibited under its complete and official registered name.

In all working classes, except western pleasure, horses will be judged on performance ability alone.

The third annual benefit rodeo and gymkhana, sponsored by the Red Rock Ranch, will begin at 9 a.m. Thursday at the Red Rock Arena on Highway 105 between Monument and Palmer Lake.

The public is invited to attend the benefit show which is a money raising project for the Colorado Boy's Ranch at La Junta. Admission is \$1 for adults and 50 cents for children.

Junior contestants must be 15 years of age or younger and senior events are for those 16 years or older. Six ribbons will be awarded for each event with trophies given to champion riders.

It is quite likely that the administration will announce within a few weeks steps it will take under existing law to help stabilize wheat and grain prices next year. It will offer perhaps a more inviting feed grain acreage reduction program than this year to hold down total production of grain. It also may require feed grain farmers to comply with wheat allotments to get benefits of the feed grain plan.

It also may allow farmers to substitute wheat on feed grain acres or feed grain on wheat acres. This action would be designed to help farmers select a grain planting pattern best suited to their particular needs.

Entries Now Open For Black Forest Gymkhana Event

Entries for the Black Forest gymkhana scheduled for Sunday, July 14 may be mailed to Mrs. Pat Moser, Route 3, Colorado Springs. Sponsored by the Black Forest Saddle Club, the big gymkhana will start at 10 a.m. and continue thru the afternoon. A colorful grand entry parade will start at 1 p.m. prior to competitive events. The morning program will include open running, horsemanship and pleasure classes.

Entries for the morning events will close at post time and entries for afternoon events will be accepted until 12 noon.

The public is invited to attend the gymkhana which is approved by the Southern Colorado Horsemen's Assn. Admission is \$1 for adults and 50 cents for children between the ages of six and 12. The drawing for a steer to be given away that day will be held during the afternoon performance.

Following the 1 p.m. grand entry events scheduled include open call roping, barrel racing, ribbon roping, girls goat tying, 75-yard dash, Washington pole bending, keyhole race and revolver race.

DIGGING IS OLD-FASHIONED

ORLANDO, Fla.—It's old-fashioned to break ground with a silver shovel in this space-age state. To break ground for its new research center, the Marlin Company used a laser beam to set off a small detonation. The blast lifted the equivalent of about four shovelfuls of dirt.

with graceful foliage and color. The choice of plants varies as long as you don't make supply blooms some of the time.

The statuary may be any size plants tall, short, fat, can add from a very small piece to a large stone carving. Old decoys You can't beat nature. But a wooden figure heads may be sense of balance and proportion integrated nicely. Plants may be the first requirements in put on blocks to balance height.

Use as many plants as you ferns, rubber plants, podocarpus, that are best grown indoors philodendron and bamboo. Ferns are tall, short, fat, can add from a very small piece to a large stone carving. Old decoys You can't beat nature. But a wooden figure heads may be sense of balance and proportion integrated nicely. Plants may be the first requirements in put on blocks to balance height.

Use as many plants as you ferns, rubber plants, podocarpus,

geraniums, combined with variegated ivy, tuberous begonia,

fuchsia, poinsettia, oxalis, lilies,

small plants could be cactus, forget-me-nots, kalanchoe, lily-of-the-valley, African violets, begonia, hyacinth, nasturtium.

Large important containers can add to the decorative effect but may clash and ruin a simple arrangement. A large container could be built to protect the floor. A rectangle or square, four inches deep, of wood, could be lined with pebbles, newspaper and an old shower curtain under it. Plants could be placed into it in their clay pots.

All plants require good light whether they hang from the ceiling or stand on the floor. They need to be kept clean and leaves should be dusted occasionally for special treatment.

All plants require good light whether they hang from the ceiling or stand on the floor. They need to be kept clean and leaves should be dusted occasionally for special treatment.

Plants can be the focal point of a room, especially in warmer weather, when a cozy fireplace especially during the winter stock groups.

Hardy plants can tolerate some abuse but some fruit-growing plants, such as the Jerusalem

plums, will not fruit if Charles Mattarochia.

The entire club gave demonstrations June 25 at the Black Forest Community Church.

GOING SOMEWHERE THIS 4th of July Weekend?

DON'T ADD YOUR CAR
TO THIS PILE!!

*a pile of
reasons for
CAREFUL
DRIVING*

Ironically, on Summer's happiest occasions (week-ends and holidays), the tragic toll of highway accidents zooms to the highest total! You literally "bet your life" every time you drive too fast, try to beat a light, cut in and out of traffic, pass another car on a hill or curve! With the stakes so high and the odds so steep, does this kind of gamble make sense to you? Isn't it a lot better to drive with care . . . take a little longer to get where you're going . . . and ARRIVE ALIVE!
